ALEX OLSON

Warren, NJ | (908)-323-0846 | alexko22222@gmail.com | LinkedIn | Portfolio | GitHub

SUMMARY

Junior Full Stack Developer with experience building and maintaining web applications in modern full-stack technologies. Fall 2025 Computer Science graduate with a background in software development, artificial intelligence, and automation. Passionate about staying at the forefront of AI and finding creative ways to leverage technology.

EDUCATION

BOSTON UNIVERSITY Boston, MA
Bachelor of Arts: Computer Science **Graduated Dec 2025**
Relevant Coursework: Software Engineering, Artificial Intelligence, Algorithms, Data Structures, Probability, Data Science
University Work Experience: CS412: Full-Stack Development Undergraduate Course Grader Sep 2025 - Dec 2025

EXPERIENCE

GIFTOGRAM Whippany, NJ
Junior Full Stack Developer Apr 2026 - Present
- Contributing to the ongoing full-stack web development and maintenance of a G2 Top 100 Software Product (2026) via implementing new features, resolving bugs, supporting database/API improvements, and overhauling API documentation.
- Participating in recurring QA efforts and on-call support rotations by troubleshooting production issues, validating releases, developing Playwright-based automation tests, and contributing to internal AI/tooling initiatives.

JERSEYSTEM Remote
AI Specialist Mar 2026 - Jun 2026
- Supported organization-wide AI adoption by developing training materials, instructional videos, and user guides, while researching enterprise AI capabilities and identifying practical use cases to improve cross-department workflows.
- Assisted in the development and optimization of Google Gemini Gem and NotebookLM chatbot solutions through prompt engineering, feature experimentation, workflow testing, documentation, and user enablement focused on AI best practices.

BAUSCH + LOMB Bridgewater, NJ
AI Automation Developer Intern Jun 2024 – Aug 2024
- Developed AI chatbot prototypes in Microsoft Copilot Studio for both department-specific and enterprise-wide deployment, integrating company knowledge bases, action features, and conversational workflows to improve employee self-service.
- Automated complex business processes using Power Automate and the Microsoft Power Platform while creating interactive AI training videos and a company micro-training portal to increase employee adoption and AI literacy.

PROJECTS *(See Portfolio Project)*

ExoCollect - Virtual Planet Discovery Web Platform | *Django, Python, PostgreSQL* Aug 2025 - Present
- Co-founded ExoCollect, a full-stack Django web platform where users "discover" uniquely generated virtual planets with attributes inspired by real astronomical frequencies. Developed user authentication, procedural planet generation algorithms, and interactive archive and leaderboard pages with advanced filtering and sorting capabilities.
- Deployed a public demo using Heroku and PostgreSQL, gathering user feedback through forms and an official LinkedIn page to guide future platform improvements while gaining experience managing a live web application.

Knomi - Personal Profile Links Web App | *Laravel, PHP, MySQL* July 2026 - Present
- Created Knomi, a full-stack web application that enables users to create customizable, shareable profile pages featuring ranked lists, personalized link hubs, and dynamic content cards. Built authenticated CRUD functionality, reusable components, drag-and-drop list management, and a scalable tab-based architecture to support future expansion.
- Deployed a live beta available to real users, gathering feedback to refine the user experience, identify bugs, and guide ongoing feature development and platform improvements.

PROJECTS *(continued)*

KS Fantasy - Fantasy Football Mobile App | *Typescript, React Native, External APIs* Sep 2026 - Present

- Developing KS Fantasy, a fantasy football mobile app utilizing the Sleeper API featuring live scoring, lineup management, waivers, trades, standings, playoffs, and league chat. Deployed on IOS for use with friends using TestFlight.

YouRise AI - YouTube Analytics & SEO Tool | *React, Django, External APIs* Mar 2026 - Apr 2026

- Constructed a React/Next.js and Django-based AI-powered web application that analyzes YouTube videos and delivers insights on performance, engagement, and SEO. Integrated the YouTube Data v3 and OpenAI APIs to create a seamless user experience, with custom scoring algorithms for deeper analysis

MassMoney - Lottery Game EV Calculator Web App| *React, Next.js, MongoDB* Nov 2025 - Dec 2025

- Collaborated on MassMoney, a React/Next.js web application that serves as a continuously updated expected value calculator for Massachusetts scratch-off lottery games, featuring responsive design, real-time data scraping, and MongoDB persistence.

EXTERNSHIPS *(What is an externship?)*

EXTERN Remote

Outamation: AI & Automation Extern Jul 2025 - Sep 2025

- Constructed AI-powered Retrieval-Augmented Generation (RAG) pipelines for automated document processing, utilizing Python, PyMuPDF, FAISS, SentenceTransformers, Gemini, LLaMA, and Gradio to create an interactive chatbot experience.

Epic Games: Game Development & Design Extern Jun 2025 - Jul 2025

- Designed and developed a fully functional Rube Goldberg machine within Unreal Engine using Blueprints and other physics-based tools. Produced a final video complete with narration and effects to present to the team at Extern and Epic Games.

COGNIZANT Remote

Generative AI Extern Apr 2025 - Jun 2025

- Developed AI-driven solutions utilizing Python, including API integration with popular large language models (LLMs) for automatic text completion, fine-tuning models to enhance accuracy, and prompt engineering for performance optimization.
- Acquired hands-on experience with key Generative AI concepts and technologies, including transformer architectures, LLMs, Generative Adversarial Networks (GANs), machine learning fundamentals, and AI bias/ethics.

LANGUAGES

- Python
- PHP
- JavaScript
- TypeScript
- Java
- OCaml

TECHNOLOGIES

- Django
- Laravel
- React
- Git/GitHub
- MySQL
- PostgreSQL
- MongoDB
- Microsoft Power Platform

CERTIFICATIONS

- HTML and CSS in depth (Meta)
- Programming with JavaScript (Meta)
- Version Control (Meta)
- Intro to Front-End Development (Meta)
- Model Context Protocol (Anthrophic)
- Intro to Gen AI (Google Cloud)
- WordPress Web Development (LearnKartS)
- SQL Foundations (Microsoft)
- Software Engineering Job Sim (Wells Fargo)
